

# Weipa Town Authority Charges Resolution (No. 2) 2023

## 1.0 Introduction

This resolution is made under section 113 of the Planning Act 2016 (the Act).

1.1 This resolution applies to the Weipa Town Authority area.

1.2 It is advised that this Charges Resolution (CR):

- (a) does not retrospectively apply to previous approvals, even if they have not yet paid charges. It only applies to decisions made after CR No.2, 2023 comes into effect;
- (b) will be applied to development applications that have not yet entered the Decision Stage (prior to CR (No.2) 2023 coming into effect), irrespective of when the application was lodged;
- (c) can be applied to a request for a 'change application' to a development approval made under section 78 of PA; and
- (d) can be applied to an 'extension application' made under section 86 of PA (Extension Applications)

Refer to section 119 of PA for details and limitations on Weipa Town Authority's ability to give applicants infrastructure charges notices for change approvals and extension approvals.

1.3 This resolution adopts a charge for particular development that is equal to or less than the maximum adopted charge specified within the *Planning Regulation 2017*. **Table 1.1** herein identifies land use categories applied under Schedule 16 of the *Planning Regulation 2017* and the land use definitions in the Weipa Town Planning Scheme 2019.

1.4 The Local Government Infrastructure Plan (LGIP) Priority Infrastructure Area (PIA) for Weipa Town Authority identifies the areas which are prioritised to accommodate urban growth for the next 10 to 15 years to ensure the efficient delivery of infrastructure. Areas outside of the PIA contain development use rights, but the provision of trunk infrastructure by the local government to support urban growth outside the PIA is generally not supported by immediate or medium-term funding within capital works programs. Infrastructure may be planned outside of the PIA to demonstrate the preferred servicing arrangements. However, Weipa Town Authority may impose a condition requiring extra payments for trunk infrastructure for premises completely or partly outside the PIA – refer to section 133 of PA.

1.4 The issuing of an infrastructure charges notice may be triggered by assessable development or development requiring compliance assessment. The types of development that may trigger the issuing of an infrastructure charges notice are:

- (a) reconfiguring of a lot;
- (b) material change of use; and
- (c) carrying out building work.

## 2.0 When the resolution has effect

This resolution has effect from 22 March 2023.

### 3.0 Dictionary

In this resolution:

**Adopted charge** means the charge set by this resolution to be applied for the purpose of calculating a levied charge as stated in section 5.0.

**Bedroom** means an area of a building or structure which:

- (a) is used, designed or intended for use for sleeping but excludes a lounge room, dining room, living room, kitchen, water closet, bathroom, laundry, garage or plant room; or
- (b) a space that can be readily closed off for sleeping such as a den, study, loft, media or home entertainment room, library, family or rumpus room or other similar space.

**Discount** means the assessed demand for an existing or past lawful use right prior to the development application to be applied within the calculation of a levied charge which acknowledges the existing usage of the trunk infrastructure networks by the premises and reduced the charges accordingly as stated in section 6.0 (Discounts).

**Dwelling** means a residential use of premises for one household that contains a single dwelling.

**Gross Floor Area (GFA)**, for a building, means the total floor area of all storeys of the building, including any mezzanines, (measured from the outside of the external walls and the centre of any common walls of the building), other than areas used for –

- (a) building services; or
- (b) a ground floor public lobby; or
- (c) a public mall in a shopping complex; or
- (d) parking, loading, or maneuvering of vehicles; or
- (e) balconies, whether roofed or not.

**Impervious area** means the area of the premises that is impervious to rainfall or overland flow that results in the discharge of stormwater from the premises.

**Lawful use** see Schedule 2 (Dictionary) of the Planning Act 2016.

**Levied charge** means the charge levied on an applicant through an infrastructure charge notice in accordance with section 119 of PA, worked out by applying the provisions of this Charges Resolution.

**Maximum adopted charge** see Schedule 16 (Prescribed Amount) of the Planning Regulation 2017.

**Planning scheme** means the Weipa Town Planning Scheme 2019.

**Producer Price Index (PPI)** means the producer price index for construction 6427.0 (ABS PPI) index number 3101 – Road and Bridge Construction index for Queensland published by the Australian Bureau of Statistics.

**3-Yearly PPI average** is defined in section 114 of the Planning Act 2016 and means the PPI adjusted according to the 3-year moving average quarterly percentage change between financial quarters.

A term defined in the Planning Act 2016 which is used in the resolution has the meaning given in the Planning Act 2016.

If a term is not defined in the resolution or the Planning Act 2016 the term is to, subject to section 14A (Interpretation Best Achieving the Act's Purpose) of the Acts Interpretation Act 1954, have

the meaning assigned to it by the edition of the Macquarie Dictionary that is current at the date the resolution takes effect.<sup>1</sup>

## 4.0 Priority Infrastructure Area

The priority infrastructure area for Weipa is identified in the Local Government Infrastructure Plan in the Weipa Town Planning Scheme 2019.

**Table 1.1: Planning Scheme Use Types to Which the Adopted Charges Apply**

Column 1 Adopted Infrastructure Charges Category – Schedule 16 Planning Regulation 2017	Column 2 Weipa Town Planning Scheme Uses
<b>Residential</b>	Caretakers Accommodation Dual Occupancy Dwelling House Dwelling Unit Multiple Dwelling
<b>Accommodation (Short Term)</b>	Hotel Non-Resident Workforce Accommodation Resort Complex (residential component) Rural Workers Accommodation Short-term Accommodation Tourist Park
<b>Accommodation (Long Term)</b>	Community Residence Relocatable Home Park Residential Care Facility Retirement Facility Rooming Accommodation
<b>Places of Assembly</b>	Club Community Use Function Facility Funeral Parlour Place of Worship
<b>Commercial (Bulk Goods)</b>	Agricultural Supplies Store Bulk Landscape Supplies Garden Centre Hardware and Trade Supplies Outdoor Sales Showroom
<b>Commercial (Retail)</b>	Adult Store Car Wash Food and Drink Outlet Service Industry Service Station Shop Shopping Centre

<sup>1</sup> Section 14A (1) (Interpretation best achieving Act's purpose) of the *Acts Interpretation Act 1954* provides that in the interpretation of a provision of the Act the interpretation that will best achieve the purpose of the Act is to be preferred to any other interpretation.

<b>Commercial (Office)</b>	Office Sales Office
<b>Education Facility</b>	Child Care Centre Community Care Centre Educational Establishment
<b>Entertainment</b>	Bar Hotel Nightclub Entertainment Facility Resort Complex (non-residential component) Theatre
<b>Indoor Sport and Recreation</b>	Indoor Sport and Recreation
<b>High Impact Industry or Special Industry</b>	High Impact Industry Special Industry
<b>Other Industry</b>	Low Impact Industry Marine Industry Medium Impact Industry Port Service Research and Technology Industry Rural Industry Transport Depot Warehouse
<b>High Impact Rural</b>	Aquaculture Intensive Horticulture Wholesale Nursery Winery
<b>Low Impact Rural</b>	Animal Husbandry Cropping Permanent Plantation
<b>Essential Services</b>	Emergency Services Health Care Services Hospital Veterinary Service
<b>Minor Uses</b>	Cemetery Home Based Business Landing Market Outstation Roadside Stall Telecommunications Facility

<p><b>Other Uses</b></p>	<p>Air Services          Animal Keeping          Brothel          Crematorium          Detention Facility          Environment Facility          Extractive Industry          Intensive Animal Husbandry          Major Electrical Infrastructure          Major Sport, Recreation and Entertainment Facility          Motor Sport Facility          Nature Based Tourism          Outdoor Sport and Recreation          Park          Parking Station          Renewable Energy Facility          Substation          Tourist Attraction          Utility Installation          Any other use not listed</p>
--------------------------	---

## 5.0 Adopted Charge

5.1 The adopted charge for a *material change of use* or *building work* for:

- (a) Residential development, is stated in **Table 2.1**;
- (b) Non-residential development (other than a specialised use), is stated in **Table 2.2** which comprises of the following
  - (i) The adopted charge as state in the column '*Local Government adopted charges excluding stormwater*'; and
  - (ii) The adopted charge for stormwater as stated in the column '*Stormwater (\$ per impervious m<sup>2</sup>)*'.

5.2 The adopted charge for reconfiguring a lot for residential and Non-residential development, it the adopted charge per allotment stated in **Table 2.3 and Table 2.4**.

5.3 Other Uses: Upon receiving a development application for an undefined use, Weipa Town Authority will determine the most appropriate equivalent use charging category to apply to the development in order to determine the adopted charge in accordance with **Tables 2.1 and 2.2**.

**Table 2.1- Adopted Infrastructure Charges: Adopted Charge for a Material Change of Use or Building Work for Residential Development**

Development for which an adopted infrastructure charge may apply		Maximum Adopted Charges	Adopted Infrastructure Charges per dwelling unit (\$)					
			Weipa Town Authority Adopted Charges	Proportional split of adopted charge per network				
				Water Supply	Sewerage	Transport	Parks and Community Facilities	Stormwater
				10%	40%	15%	35%	0%
Residential Uses	1 or 2 bedroom dwelling	\$22,200.00 per dwelling	\$11,100.00 per dwelling	\$1,110.00	\$4,440.00	\$1,665.00	\$3,885.00	\$0
	3 or more bedroom dwelling	\$31,080.00 per dwelling	\$15,540.00 per dwelling	\$1,554.00	\$6,216.00	\$2,331.00	\$5,439.00	\$0
Accommodation (Short Term)	1 or 2 bedroom suite	\$11,099.95 per suite	\$5,549.97 per suite	\$554.98	\$2,220.00	\$832.50	\$1,942.49	\$0
	3 or more bedroom suite	\$15,539.90 per suite	\$7,769.95 per suite	\$777.00	\$3,107.98	\$1,165.49	\$2,719.48	\$0
	Bedroom that is not part of a suite	\$11,099.95 per bedroom	\$5,549.97 per bedroom	\$554.98	\$2,220.00	\$832.50	\$1,942.49	\$0
Accommodation (Short Term): Tourist Park	Group of 1 or 2 sites	\$11,099.95 per group	\$5,549.97 per group	\$554.98	\$2,220.00	\$832.50	\$1,942.49	\$0
	Group of 3 sites	\$15,539.90 per group	\$7,769.95 per group	\$777.00	\$3,107.98	\$1,165.49	\$2,719.48	\$0
	1 or 2 bedroom cabin	\$11,099.95 per group	\$5,549.97 per cabin	\$554.98	\$2,220.00	\$832.50	\$1,942.49	\$0
	3 or more bedroom cabin	\$15,539.90 per group	\$7,769.95 per cabin	\$777.00	\$3,107.98	\$1,165.49	\$2,719.48	\$0
Accommodation (Long Term)	1 or 2 bedroom suite	\$22,200.00 per suite	\$11,100.00 per suite	\$1,110.00	\$4,440.00	\$1,665.00	\$3,885.00	\$0
	3 or more bedroom suite	\$31,080.00 per suite	\$15,540.00 per suite	\$1,554.00	\$6,216.00	\$2,331.00	\$5,439.00	\$0
	Bedroom that is not part of a suite	\$22,200.00 per suite	\$11,100.00 per suite	\$1,110.00	\$4,440.00	\$1,665.00	\$3,885.00	\$0

Accommodation (Long Term) Relocatable Home Park	1 or 2 bedroom relocatable dwelling sites	\$22,200.00 per site	\$11,100.00 per site	\$1,110.00	\$4,440.00	\$1,665.00	\$3,885.00	\$0
	3 or more bedroom relocatable dwelling sites	\$31,080.00 per site	\$15,540.00 per site	\$1,554.00	\$6,216.00	\$2,331.00	\$5,439.00	\$0

**Table 2.2 - Adopted Infrastructure Charges: Material Change of Use or Building Work for Non-Residential Development**

Development for which an adopted infrastructure charge may apply	Maximum Adopted Charges		Adopted Infrastructure Charges					Stormwater (\$ per impervious m <sup>2</sup> )
	Maximum Adopted Charges (\$ per m <sup>2</sup> GFA)	Maximum Adopted Charges for Stormwater Network (\$ per impervious m <sup>2</sup> )	Weipa Town Authority Infrastructure Charges (excluding stormwater) (\$ per m <sup>2</sup> GFA)	Proportional Split of Adopted Charge per Network				
				Water Supply	Sewerage	Transport	Parks and Community Facilities	
				12%	63%	25%	0%	
Places of Assembly	\$77.75	\$11.10	\$38.87	\$4.66	\$24.49	\$9.72	\$0.00	\$0.00
Commercial (Bulk Goods)	\$155.40	\$11.10	\$77.70	\$9.32	\$48.95	\$19.43	\$0.00	\$0.00
Commercial (Retail)	\$199.80	\$11.10	\$99.90	\$11.98	\$62.94	\$24.98	\$0.00	\$0.00
Commercial (Office)	\$155.40	\$11.10	\$77.70	\$9.32	\$48.95	\$19.43	\$0.00	\$0.00
Education Facility	\$155.40	\$11.10	\$77.70	\$9.32	\$48.95	\$19.43	\$0.00	\$0.00
Education Facility: Establishment for the Flying Start for QLD Children Program	Nil	Nil	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00
Entertainment	\$221.95	\$11.10	\$110.97	\$13.32	\$69.91	\$27.74	\$0.00	\$0.00
Indoor Sport and Recreation	\$221.95 <i>excluding court area</i>	\$11.10	\$110.97	\$13.32	\$69.91	\$27.74	\$0.00	\$0.00
	\$22.15 <i>court area</i>	\$11.10	\$11.08	\$1.33	\$6.98	\$2.77	\$0.00	\$0.00
High Impact Industry or Special Industry	\$77.75	\$11.10	\$38.87	\$4.66	\$24.49	\$9.72	\$0.00	\$0.00

Other Industry	\$55.50	\$11.10	\$27.75	\$3.33	\$17.48	\$6.94	\$0.00	\$0.00
High Impact Rural	\$22.15	Nil	\$11.08	\$1.33	\$6.98	\$2.77	\$0.00	\$0.00
Low Impact Rural	Nil	Nil	Nil	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00
Essential Services	\$155.40	\$11.10	\$77.70	\$9.32	\$48.95	\$19.43	\$0.00	\$0.00
Minor Uses	Nil	Nil	Nil	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00
Other Uses	The prescribed amount for another similar use listed in Column 1 that the Local Government decides to apply to the use							

**Table 2.3 - Adopted Infrastructure Charges: Reconfiguring a Lot**

Development for which an adopted infrastructure charge may apply	Adopted Infrastructure Charges (\$ per allotment)						
	Maximum Adopted Charges	Weipa Town Authority Adopted Charges	Water Supply	Sewerage	Transport	Parks and Community Facilities	Stormwater
			10%	40%	15%	35%	0%
Residential	\$31,080.00	\$15,540.00	\$1,554.00	\$6,216.00	\$2,331.00	\$5,439.00	\$0.00

**Table 2.4 - Adopted Infrastructure Charges: Reconfiguring a Lot**

Development for which an adopted infrastructure charge may apply	Adopted Infrastructure Charges (\$ per allotment)						
	Maximum Adopted Charges	Weipa Town Authority Adopted Charges	Water Supply	Sewerage	Transport	Parks and Community Facilities	Stormwater
			12%	63%	25%	0%	0%
Non-residential	\$31,080.00	\$15,540.00	\$1,864.80	\$9,790.20	\$3,885.00	\$0.00	\$0.00

## 6.0 Discount

- 6.1 In accordance with s120 of the Planning Act 2016, a levied charge may be only for extra demand placed upon trunk infrastructure that will be generated by the development. Weipa Town Authority has set out the discounts that will be taken into account for the calculation of the levied charge on the premises over which the application is made, based on the higher value of:
- (a) Where a levied charge has been paid for the development of the premises, the levied charge paid; or
  - (b) Where the premises is subject to an existing lawful use for which evidence can be provided, the adopted charge for the existing lawful use of the premises; or
  - (c) Where the premises contained a previous lawful use that is no longer taking place, and where evidence can be provided of the previous lawful use, the adopted charge based on the previous lawful use of the premises; or
  - (d) Where vacant serviced land exists or where no lawful use has been constructed on the premises, the adopted charge for one residential allotment for each of the lots to which the development relates; or
  - (e) Where an infrastructure contribution was provided for the development of the premises under previous infrastructure charging policies, the charge paid at the time of payment subject to indexation<sup>2</sup> and evidence of payment made.
- 6.2 Discounts in Section 6.1(b) – (c) will be calculated in the same manner in which the relevant demand and charge is calculated under Section 7.0. To avoid doubt, Weipa Town Authority is only charging for the additional demand caused by the proposed development. Discounts will not be provided for networks that do not currently service the site.
- 6.3 A discount calculated under Section 6.1 and Section 6.2 will not be higher than the levied charge. To avoid doubt, surplus discounts, if any, will not be refunded.
- 6.4 Despite Section 6.3, Weipa Town Authority may in its absolute discretion, enter into an infrastructure agreement to attach any surplus discounts to the land and these discounts may be offset against any future levied charge.
- 6.5 Any discount calculated in accordance with Section 6.1 - 6.4 is to be allocated to the trunk infrastructure network to which the discount was accrued, unless otherwise determined under a separate infrastructure agreement between Weipa Town Authority and the applicant.

## 7.0 Calculation of the Levied Charge

- 7.1 The following steps identify the process to calculate the levied charge for a development application:
- Step 1** Determine the relevant adopted infrastructure charges category based on the translation of the planning scheme use type in **Table 1.1** that is applicable to the proposed development.
  - Step 2** Determine the development demand unit (e.g., m<sup>2</sup> GFA) and associated charge rate (i.e., \$/demand unit) that may be levied for the proposed development as stated in Section 5.0:

---

<sup>2</sup> To be calculated by indexing the infrastructure contributions previously paid based on the difference between the Producer Price Index (PPI) applicable at the time the infrastructure contribution was paid, and the PPI applicable at the time this resolution took effect, adjusted to the 3-yearly PPI average.

- *for Material Change of Use or Building Work* refer to **Tables 2.1 and 2.2**
- *for Reconfiguring a Lot* - refer to **Table 2.3 and 2.4.**

Should the area within which the site is located not be serviced, or is not planned to be serviced, by Weipa Town Authority trunk sewerage and water networks then such separate components of the charge shall be deducted from the total adopted charge payable

- Step 3** Determine any existing discount amount for each trunk infrastructure network currently servicing the premises as stated in Section 6.0.
- Step 4** Calculate the levied charge by subtracting the applicable discount amount from the adopted charge amount for each trunk infrastructure network (in monetary values).
- 7.2 A development proposal that includes more than one use (mixed use development) may involve uses or development with different assessable demands under **Tables 2.1 and 2.2**. The following rules will apply to the calculation of the demand and associated charge for a mixed-use development:
- (a) if more than one use is proposed to occur in any given area the subject of the approval, the levied charge will be the sum of the individual charge for each use calculated in accordance with Section 7.1.
  - (b) if an approved development includes an area which is common to two or more uses identified in **Tables 2.1 and 2.2**, the assessable demand for the common area will be based on the use or development with the highest charge amount.
- 7.3 If an adopted charge is intended to be levied pursuant to a building works approval and the building may be used for more than one use under **Tables 2.1 and 2.2**, the levied charge will be the sum of the individual charge for each use calculated in accordance with Section 7.1.

## 8.0 Payment Triggers

This section states when a levied infrastructure charge is to be paid.

- 8.1 A levied charge is payable at the following time:
- (a) if the charge applies to reconfiguring a lot that is assessable development – when the local government approved the plan of subdivision for the reconfiguration.
  - (b) if the charge applies to a material change of use – when the change of use happens
  - (c) if the charge applies to building work that is assessable development – when the final inspection certificate (for a single detached class 1a building or class 10 building or structure) or certificate of classification (for a building or structure of another class) for the building work is given.
  - (d) if paragraphs (a), (b) and (c) do not apply, on the day stated in the infrastructure charges notice or negotiated infrastructure charges notice under which the charge was levied.
  - (e) as otherwise specified in a written agreement between Weipa Town Authority and the applicant, including whether it may be paid by installments.

## 9.0 Automatic Increase Provision for Levied Charges

- 9.1 An infrastructure charge levied by Weipa Town Authority is to be increased by the difference

between the Producer Price Index (PPI) applicable at the time the infrastructure charge was levied, and the PPI applicable at the time of payment of the levied charge<sup>3</sup>, adjusted by reference to the 3-yearly PPI average<sup>4</sup>.

- 9.2 If the levied charge is increased using the method described above, the charge payable is the amount equal to the sum of the charge as levied and the amount of the increase.
- 9.3 The sum of the charge as levied, and the amount of the increase is not to exceed the maximum adopted charge the Weipa Town Authority could have levied for the development at the time the charge is paid.

## 10.0 Conversion Applications

### 10.1 Purpose

10.1.1 This section applies where:

- (a) A condition of a development approval under Section 145 of PA requires non-trunk infrastructure to be provided; and
- (b) The construction of the non-trunk infrastructure has not started; and
- (c) The applicant for the development approval is seeking to apply to Weipa Town Authority to convert the non-trunk infrastructure to trunk infrastructure (a conversion application)

10.1.2 Weipa Town Authority's requirements for making an application and the process of assessing and deciding the conversion application is identified below.

### 10.2 Process for making a conversion application

10.2.1 A conversion application must:

- (a) be in writing;
- (b) be accompanied by the completed Weipa Town Authority prescribed form for conversion applications (if applicable)
- (c) relate to non-trunk infrastructure conditioned under section 145 of the PA;
- (d) be lodged with Weipa Town Authority before construction of the relevant non-trunk infrastructure commences;
- (e) be accompanied by supporting information, including:
  - (i) Details of the relevant development approval including application number, property address and real property description;
  - (ii) The applicants contact details;
  - (iii) The relevant condition(s) for non-trunk infrastructure imposed under section 145 of PA to which the conversion application related.
  - (iv) A written statement that construction of the infrastructure had not commenced prior to the making of the conversion application;
  - (v) A description of the circumstances giving rise to the conversion application including supporting commentary and rationale that addresses Weipa Town Authority's trunk infrastructure criteria;

<sup>3</sup> To be clear, the charge to be paid is the greater of the charge as levied by Weipa Town Authority and the levied charge indexed using the Producer Price Index (adjusted by reference to the 3-yearly PPI average) for the period starting on the day the charge is levied and ending on the day the charge is paid.

<sup>4</sup> 3-yearly PPI average is defined in Section 114 of the Planning Act 2016 and means the PPI adjusted according to the 3-year moving average quarterly percentage change between financial quarters. PPI is the producer price index for construction 6427.0 (ABS PPI) index number 3101 – Road and Bridge Construction Index for Queensland published by the Australian Bureau of Statistics.

- (vi) Other relevant supporting information where available, including:
  - Engineering estimates of works;
  - Preliminary design plans;
  - Network servicing analysis;
  - Details of special considerations (e.g. geographical context)
- (vii) Be made within one (1) year after the development approval starts to have effect.

### 10.3 Assessing and Deciding a Conversion Application

#### 10.3.1 The process of assessing and deciding

- (a) Weipa Town Authority will assess the application having regard to its trunk infrastructure criteria (outlined below)
- (b) Weipa Town Authority must consider and decide the application within the required period, being 30 business days after:
  - (i) The making of the application; or
  - (ii) If an information request is made, the applicant complies with the request.
- (c) At any time before making its decision, Weipa Town Authority may give notice to the applicant requiring additional information for making the decision.
- (d) The notice must state:
  - (i) The information required;
  - (ii) A period of at least 10 business days for giving the information;
  - (iii) That the application will lapse if the applicant does not comply with the notice within the specified period; or any later period as agreed between the Weipa Town Authority and the applicant within the specified period.
- (e) Weipa Town Authority must, as soon as practicable after deciding the conversion application, give the applicant notice of its decision.
- (f) If the decision is to convert non-trunk infrastructure to trunk infrastructure, the notice must state whether an offset or refund applies and if so, the details of the offset or refund.
- (g) If the decision is to not convert the non-trunk infrastructure to trunk infrastructure, the notice must be an information notice which states:
  - (i) The decision and the reasons for the decision;
  - (ii) That its recipient may appeal against the decision; and
  - (iii) How the recipient may appeal.

### 10.4 Effect of Conversion

#### 10.4.1 If Weipa Town Authority's decision is to convert the non-trunk infrastructure to trunk infrastructure:

- (a) The condition of the relevant development approval requiring non-trunk infrastructure to be provided, no longer has effect;
- (b) Weipa Town Authority may, within 20 business days after making the decision, amend the development approval by imposing a necessary infrastructure condition for the trunk infrastructure; and

- (c) If the necessary trunk infrastructure condition is imposed, Weipa Town Authority will, within 10 business days after imposing the condition, give an infrastructure charges notice or amend, by notice to the applicant, any existing infrastructure charges notice for the development approval for the purposes of determining any offset or refund requirements.

## 10.5 Trunk Infrastructure Criteria

10.5.1 The identified trunk infrastructure criteria for deciding whether or not to convert non-trunk infrastructure to trunk infrastructure are the following:

- (a) The infrastructure is consistent with Weipa Town Authority's **Standards of Service** stated in within the Local Government Infrastructure Plan; and
- (b) The infrastructure is identified in Weipa Town Authority's plans for trunk infrastructure identified within the Local Government Infrastructure Plan, but is required in a different geographical location; or
- (c) The infrastructure is consistent with Weipa town Authority's identified trunk infrastructure within the Local Government Infrastructure Plan and the **Indicative Trunk Infrastructure** identified in **Attachment 3**; or
- (d) For infrastructure that is not consistent with the Weipa Town Authority's identified trunk infrastructure, the infrastructure is consistent with all of the following **trunk infrastructure principles**:
  - (i) Facilitates development of other premises by enabling increased development or overcoming deficiencies in service through its provision; and
  - (ii) Reduces or eliminates unnecessary and interim staged infrastructure; and
  - (iii) Is shared between multiple development sites or provides a critical shared link between multiple development sites and the defined and mapped trunk infrastructure network; and
  - (iv) Would have been identified as 'trunk' infrastructure had the ultimate demand and development pattern been known in more detail at the time of developing the Local Government Infrastructure Plan; and
  - (v) They type, size and location of the infrastructure is the most cost effective option for servicing multiple users in the area. The most effective option means the least cost option based upon the life cycle cost of the infrastructure required to service existing and future development in the area at the desired standard of service.

## 11.0 Offsets and Refunds for Trunk Infrastructure

### 11.1 Application of an Offset and Refund

11.1.1 Unless otherwise provided for in an infrastructure agreement, this section applies where:

- (a) a development application has been conditioned to provide necessary trunk infrastructure; or
- (b) non-trunk infrastructure has been converted to trunk infrastructure through a conversion application; and
- (c) an adopted charge applies to the development.

- 11.1.2 Where the establishment cost for the trunk infrastructure is equal to or less than the levied charge, the cost will be offset against the levied charges (an offset).
- 11.1.3 Where the establishment cost for the trunk infrastructure is more than the levied charge and the trunk infrastructure has been provided:
- (a) there is no amount payable for the development approval; and
  - (b) Weipa Town Authority will provide a refund to the applicant for the difference between the establishment cost of the trunk infrastructure and the levied charge (a refund), in accordance with the provisions of this charges resolution.
- 11.1.4 The value, timing and reconciliation of payments may also be managed by an infrastructure agreement which may further specify or alter the provisions in this resolution including for staged development.
- 11.2 Determining the establishment cost of trunk infrastructure
- 11.2.1 The Infrastructure Charges Notice for a development approval may specify an establishment cost for trunk infrastructure that is the subject of a necessary trunk infrastructure condition.
- (a) For infrastructure identified in the LGIP, the establishment costs for works will be the Base Estimate Valuation, which includes an allowance for on-costs for the asset, as identified within the LGIP Schedule of Works model. Establishments cost for land will be the Land Value identified within the LGIP Schedule of Works model.
  - (b) For infrastructure not identified in the LGIP, the establishment cost for land and works will be determined based on valuation methodologies identified in the Extrinsic Material to the LGIP.
- 11.2.2 The establishment cost in the Infrastructure Charges Notice is an indicative preliminary establishment cost only based on Weipa Town Authority's best estimate at the time of issuing the Infrastructure Charges Notice based on the plans for trunk infrastructure, Weipa Town Authority's unit rates, or other known project cost estimates.
- 11.2.3 If the applicant disagrees with the establishment cost, a request for recalculation may be submitted in accordance with s137 of the *Planning Act 2016*. The establishment cost for trunk infrastructure works will be recalculated in accordance with the methods identified in **Attachments 1 and 2**.
- 11.2.4 Weipa Town Authority, at the request of the Applicant and at its absolute discretion, may agree to issue an amended ICN prior to the completion of the works recalculation method process identified in **Attachment 1**. The applicant may request that an amended ICN be issued at the following milestones:
- (a) Following Weipa Town Authority agreement being given for a Notice of Preliminary Design; or
  - (b) Following submission of a *Notice of Contract Value (Interim)*.

Agreement may be given by Weipa Town Authority in circumstances where variations to the scope and value of the trunk infrastructure works present a low risk to Weipa Town Authority, or in instances where final contract values are unable to be determined prior to works receiving an 'on-maintenance' certificate from Weipa Town Authority,

### 11.3 Reconciliation of an Offset or Refund

- 11.3.1 An applicant entitled to an offset or refund for the trunk infrastructure contribution is to give to Weipa Town Authority a notice in the prescribed form which states:
- (a) The date the fully completed trunk infrastructure was accepted 'On Maintenance'; or
  - (b) The date Weipa Town Authority accepted an Uncompleted Works Deed for uncompleted works.
- 11.3.2 Weipa Town Authority will as soon as reasonably practicable after receiving a notice under section 11.3.1 confirm if the establishment cost is:
- (a) For an offset, less than the levied charge; or
  - (b) For a refund, greater than the levied charge.
- 11.3.3 For the purposes of determining if an offset or refund applies, the levied charge is to be indexed from the date it was levied to date that the establishment cost was determined by Weipa Town Authority, using the 3-yearly PPI average.
- 11.3.4 If an offset applies, Weipa Town Authority is to set off the establishment cost against the levied charge when the levied charge stated in the infrastructure charges notice is payable.
- 11.3.5 If a refund applies, Weipa Town Authority is to:
- (a) determine the value of the refund by subtracting the levied charge<sup>5</sup> from the establishment cost; and
  - (b) give the refund to the applicant.
- 11.3.6 Weipa Town Authority has adopted a policy position in relation to the form of the refund to be given to the applicant. Weipa Town Authority's policy position is that the refund will be proved as either an:
- (a) Infrastructure demand credit, in the first instance and where agreed to with the applicant; or
  - (b) Cash payment refund.

### 11.4 Infrastructure Demand Credits

- 11.4.1 In the first instance, Weipa Town Authority will seek to provide a refund in the form of an Infrastructure demand credit through written agreement with the applicant. The following methods for assigning the demand credits will be applied in order of preference:
- (a) Where future stages are to be developed under the approval and the future stages will be subject to a levied charge; the refund is to be held as a demand credit on the land that is the subject of the future stages of development;
  - (b) Where (a) does not apply, and the applicant or related entities of the applicant hold development approvals over other land in the Local Government Area that will be subject to a levied charge, the refund is to be held as a credit against the parcels of land the subject of the development approval(s);

---

<sup>5</sup> Indexed from the date it was levied to the date that the establishment cost of the trunk infrastructure was confirmed by Weipa Town Authority using the 3-yearly PPI average.

(c) Where (a) or (b) do not apply and the applicant or related entities of the applicant:

- (i) have development applications currently being assessed by Weipa Town Authority in the Local Government Area that, if approved, would be subject to a levied charge; and
- (ii) is the current owner of the land;

the refund is to be held as a credit against the land that is the subject of the development applications upon the application(s) being approved.

11.4.2 Demand credits are determined by dividing the monetary value of the refund by the total adopted charge rate for a 3-bedroom dwelling (for applicable networks only) in the charge area in which the demand credits are to be assigned. The value of one demand credit is the total adopted charge (for applicable networks) for a 3-bedroom dwelling in the charge area in which the credit is assigned.

Example:

- A refund of \$114,769 has been calculated for an approved development in Weipa Town Authority.
- The refund is to be held on the land to be used in future stages of the same development.
- The adopted charge for a 3-bedroom dwelling is \$28,692.25 (for all networks).
- The demand credit is four (4) 3-bedroom dwellings ( $\$114,769 / \$28,692.25$ ).

11.4.3 Claiming Demand Credit – The demand credits calculated in 11.4.2 are to be multiplied by the current adopted charge rate for a 3-bedroom dwelling in the charge area in which the demand credit was assigned. This amount can be used to reduce the amount of the levied charge that is payable for other development that is subject to the agreement.

## 11.5 Timing of Refund

11.5.1 Where infrastructure demand credits do not apply, a cash payment refund will be paid in accordance with the following payment triggers:

- (a) for a refund which is an amount that is \$100,000 or less – the refund may be given by 30 June in the financial year following the date the trunk infrastructure contribution was completed;
- (b) for a refund which is an amount that is more than \$100,000 but not more than \$250,000 – the refund may be given in installments by 30 June of each financial year for up to 3 years following the date the trunk infrastructure contribution was completed;
- (c) for a refund which is more than \$250,000 – the refund may be given in installments by 30 June of each financial year for up to 5 years following the date the trunk infrastructure contribution was completed.

11.5.2 Where the refund or part of the refund is not given in the same financial year that it was calculated, the refund or part of the refund provided in the subsequent financial year(s) is to be indexed to the time that it is refunded in accordance with the 3-yearly PPI average.

## 11.6 Infrastructure Agreements

11.6.1 Weipa Town Authority, at its absolute discretion, may enter into an Infrastructure Agreement where alternatives to the above processes are being sought by an applicant or to address other matters including (but not limited to):

- a) the method for determining the establishment cost of trunk infrastructure;
- b) the required charges or trunk infrastructure to be contributed for each component or hierarchy of the network;
- c) the timing of payment of levied charges;
- d) the nature and timing of offsets and refunds;
- e) the nature of any security to be lodged and the details of the use and release of such security;
- f) details of the trunk infrastructure to be provided and the provision program;
- g) details of the responsible entity for the funding, design and construction of the trunk infrastructure including land acquisition (if applicable);
- h) limited novation, assignment, and rescission provisions to allow an alternate party to construct the same trunk infrastructure detailed in the agreement;
- i) provisions for unforeseen delays and redundancy provisions where a development approval and trunk infrastructure construction activities are held in abeyance;
- j) any other details considered appropriate by the Weipa Town Authority.

11.6.2 All infrastructure agreements are to be prepared at no cost to Weipa Town Authority.

## 12.0 Plans for Trunk Infrastructure

12.1 Refer to the applicable section of the Local Government Infrastructure Plan.

## 13.0 Desired Standard of Service

13.1 Refer to the applicable section of the Local Government Infrastructure Plan.

## 14.0 Schedule of infrastructure unit rates

14.1 Refer to the applicable section of the Local Government Infrastructure Plan.

## Attachment 1 – Method for recalculating the establishment cost for trunk infrastructure works – Determining Final Contract Value

### 1. Preliminary Engineering Assessment

- a. Following the preliminary design for the trunk infrastructure works, the Applicant must provide to Weipa Town Authority a Notice of Preliminary Design using the relevant Weipa Town Authority forms, including a plan which clearly depicts the trunk infrastructure items that are the subject of the necessary trunk infrastructure condition;
- b. The **Notice of Preliminary Design** must include preliminary bill of quantities for the trunk infrastructure items, and an opinion of cost, on which the initial recalculation will be based;

**Note:** The intent of the Notice of Preliminary Design process is to attain early agreement as to the scope and nature of the trunk works generally described in the Development Approval.

- c. Weipa Town Authority will assess the **Notice of Preliminary Design** in conjunction with the Development Approval and will advise the applicant if Weipa Town Authority:
  - a. Agrees; or
  - b. Agrees with amendments; or
  - c. Disagrees with the Applicant's **Notice of Preliminary Design**
- d. Once a **Notice of Preliminary Design** is agreed, Weipa Town Authority will issue a notice to the Applicant, acknowledging the commencement of the recalculation process, confirming the Opinion of Cost Value, and noting that the establishment cost in the ICN will be amended following compliance with the finalisation of the recalculation process.
- e. Weipa Town Authority, at the request of the Applicant and at its absolute discretion, may agree to issue an amended ICN prior to the completion of the works recalculation method, accepting the Opinion of Cost Value identified under **Notice of Preliminary Design** as the Establishment Cost for the trunk infrastructure.

### 2. Notice of Design with Operational Works

- a. Upon lodgement of the development application for Operational Works, the Applicant is to provide to Weipa Town Authority a Notice of Design, which includes a plan which clearly depicts each trunk infrastructure item that is the subject of a necessary trunk infrastructure condition. The plan may be in the same format as the operational works plan; however, it must clearly distinguish the trunk infrastructure from any non-trunk infrastructure.

**Note:** The intent of the Notice of Design process is to ensure agreement as to the scope and nature of the trunk works generally described in the Development Approval, including any changes that have occurred through the preliminary design process.

- b. Weipa Town Authority will assess the **Notice of Preliminary Design** in conjunction with the Operational Works application and will advise the applicant if Weipa Town Authority:
  - i. Agrees; or
  - ii. Agrees with amendments; or
  - iii. Disagrees with the Applicant's **Notice of Preliminary Design**

- c. Once a Design Approval is given which forms part of the Operational Works Approval and Permit, the applicant may then seek to tender the construction of the trunk works.

### 3. Call for Tender Notification

- a. At the time that the applicant calls for public tenders for the trunk infrastructure works, a notice (a **Notice to Tender**) containing the following information is to be submitted to Weipa Town Authority:
  - i. Final detailed design documents;
  - ii. A Bill of Quantities\* for the Trunk Works (no costs required) that matches the Trunk Works identified in the Operational Works Approval including the **Notice of Design**;
  - iii. Notification of any prospective tenderers that the tender documents have been sent to specifically as part of the open public tender; and
  - iv. The criteria and process for tender assessment that the Applicant and the RPEQ will undergo.

**Note:** The bill of quantities should be presented as a 'separable portion' from the rest of the non-trunk (internal) development works, and in the same format it would be presented to tenderers as part of a tender process. Providing the information in this manner will ensure Weipa Town Authority's assessment of the trunk infrastructure design, bill of quantities and costs is seamless and expedited.

### 4. Tender Assessment of Trunk Works

- a. In procuring the Trunk Works, the following costs can be included in the offset/refund value:
  - i. the cost of planning and designing the work;
  - ii. the cost of survey and site investigation for the work;
  - iii. the cost of relocation of services which are considered necessary to deliver the works in accordance with Weipa Town Authority standards;
  - iv. a cost (fixed or provisional) under a construction contract for the work;
  - v. contract administration;
  - vi. construction/engineering supervision;
  - vii. a portable long service leave payment for a construction contract;
  - viii. an insurance premium for the work;
  - ix. Weipa Town Authority's inspection fee for the commencement and end of the maintenance period for the work;
  - x. the cost of an approval for the work; and
  - xi. any variations agreed to by Weipa Town Authority as a result of agreed site directions including the superintendent of works and the Weipa Town Authority officer.
- b. The following is to be excluded from the offset/refund value of the trunk works:
  - i. the cost of carrying out temporary infrastructure;
  - ii. the cost of carrying out non-trunk infrastructure;
  - iii. the cost of the decommissioning, removal and rehabilitation of infrastructure identified in (i) and (ii) above;
  - iv. the part of the trunk infrastructure contribution provided by Weipa Town Authority or a person other than the person seeking the infrastructure offset;
  - v. a cost to the extent that GST is payable, and an input tax credit can be claimed for the

- work;
  - vi. the cost of carrying out relocation or rehabilitation works for existing infrastructure not directly associated with the supply of trunk works.
- c. In procuring the trunk works, the applicant is to provide to Weipa Town Authority a Notice (**Notice of Tender Assessment**) which identifies:
- i. the tender process conducted;
  - ii. the tenders received including separable portions and contract values for trunk works within the bill of quantities;
  - iii. the applicant's preferred tenderer;
  - iv. the applicant's reason(s) for the preferred tenderer in a tender evaluation report;
  - v. the terms of the proposed work contract; and
  - vi. a plan for each infrastructure network clearly showing the extent of the works or land for which the infrastructure offset is sought.
- d. Within 10 business days of receiving a **Notice of Tender Assessment**, Weipa Town Authority is to provide a Notice confirming the Initial Contract Value, having regard to matters outlined in this section only.

#### 5. Reconciliation of Contract Value (Interim)

- a. A Reconciliation of the Contract Value is to occur following lodgement of the earlier of:
- i. an application for 'On Maintenance' with Weipa Town Authority for the Trunk Works; or
  - ii. lodgement of an Uncompleted Works Bond.
- b. If the Applicant is approaching completion of the Trunk Works and is seeking an '**On Maintenance**' certificate from Weipa Town Authority for the Trunk Works, the Applicant is to provide to Weipa Town Authority a **Notice of Interim Contract Value**. The Notice is to include the following:
- i. Copy of RPEQ Certificate(s) of Payment for each Progress Claim for the Trunk Works and any agreed variations to date;
  - ii. A reasonable amount of evidence to support any claimed and agreed variations (e.g. consultant reports, weigh bills, meeting minutes with Weipa Town Authority officers, design details etc.); and
  - iii. A consolidated Final Bill of Quantities in the same general format as was included in the Notice to Tender, but having regard for (i) and (ii) above.
- c. Within five (5) business days of Weipa Town Authority's satisfaction that:
- i. b) (i) and (ii) above are consistent with the Design Approval and **Notice of Tender Assessment**; and
  - ii. 'On Maintenance' being given by Weipa Town Authority for the Trunk Works,
- the Weipa Town Authority is to confirm the Interim Contract Value.
- d. In certain circumstances, and at Weipa Town Authority's full discretion, Weipa Town Authority may accept a bond or security for Uncompleted Works prior to the Trunk Works being accepted as 'On Maintenance'. In this circumstance, the following will apply:
- i. If the Applicant has **not fully** completed the Trunk Works and is seeking early Plan Sealing or compliance with Conditions from Weipa Town Authority through the signing of an Uncompleted Works Deed, the Applicant is to provide a **Notice of Interim**

**Contract Value.** The Notice is to include the following:

- A. Copy of an RPEQ Certificate of Payment for each Progress Claim for the Trunk Works and any agreed variations to the date of the calculation of remaining works for the purpose of the Uncompleted Works Bond;
  - B. A reasonable amount of evidence to support any claimed and agreed variations (e.g. consultant reports, weigh bills, meeting minutes with Weipa Town Authority officers, design details etc.);
  - C. An RPEQ certified assessment in line with the quantities and costs of remaining works specified for the Trunk Works component in the Uncompleted Works Deed submitted to Weipa Town Authority; and
  - D. A consolidated final bill of quantities in the same general format as was included in the Notice to Tender, but having regard for A and B above, and including the estimated amount in line with C above.
- ii. Within 10 business days of Weipa Town Authority's satisfaction that:
- A. (i) and (ii) above are consistent with the Design Approval and **Notice of Tender Assessment**; and
  - B. The acceptance of an Uncompleted Works Deed by Weipa Town Authority for the Trunk Works,
- the Weipa Town Authority is to confirm the Interim Contract Value.
- e. Weipa Town Authority, at the request of the Applicant and at its absolute discretion, may agree to issue an amended ICN prior to the completion of the works recalculation method, accepting the Interim Contract Value identified under **Notice of Interim Contract Value** as the Establishment Cost for the trunk infrastructure.

## 6. Reconciliation of Final Contract Value

- a. A reconciliation of the *Final Contract Value* is to occur following the finalisation of the contract for the infrastructure works. If the Applicant has **fully** completed the Trunk Works and is seeking an 'On Maintenance' certificate from Weipa Town Authority for the Trunk Works, the Applicant is to provide to Weipa Town Authority a **Notice of Final Contract Value**.
- i. The Notice is to include the following:
- A. Copy of RPEQ Certificate(s) of Payment for each Progress Claim for the Trunk Works and any agreed variations;
  - B. A reasonable amount of evidence to support any claimed and agreed variations (e.g. consultant reports, weigh bills, meeting minutes with Weipa Town Authority officers, design details etc.); and
  - C. A consolidated final bill of quantities in the same general format as was included in the Notice to Tender, but having regard for A and B above.
- ii. Within 10 business days of Weipa Town Authority's satisfaction that:
- A. (i) and (ii) above are consistent with the Design Approval and **Notice of Tender Assessment**; and
  - B. The acceptance of an Uncompleted Works Deed by Weipa Town Authority for the Trunk Works,
- the Weipa Town Authority is to confirm the Final Contract Value.
- b. Weipa Town Authority must issue an amended ICN, accepting the Final Contract Value identified under **Notice of Final Contract Value** as the Establishment Cost for the trunk infrastructure.

## Attachment 2 – Method for recalculating the establishment cost for trunk infrastructure land

In accordance with the requirements of the Planning Act 2016 and the Ministers Guidelines and Rules, the recalculation process for the establishment cost of trunk infrastructure that is land, determines the market value using the before and after method of valuation.

For land infrastructure that has been identified in the LGIP, the valuation must be undertaken to determine the market value that would have applied on the day the development application, which is the subject of the trunk infrastructure condition, first became properly made.

For land infrastructure that has not been identified in the LGIP, the valuation must be undertaken to determine the market value that would have applied on the day the development application, which is the subject of the trunk infrastructure condition, was approved.

The following outlines the process identified within the Ministers Guidelines and Rules for determining the cost of infrastructure that is land.

### 1. Land Valuation Report

Submit a notice and land valuation report to Weipa Town Authority, undertaken by a certified practicing valuer who must act professionally as a neutral and independent expert, using the before and after method of valuation by:

- a) determining the value of the original land before any land is transferred to Weipa Town Authority;
- b) determining the value of the remaining land that will not be transferred to Weipa Town Authority; and
- c) subtracting the value determined for the remaining land that will not be transferred to Weipa Town Authority from the value determined for the original land.

The valuation report must:

- a) Include supporting information regarding the highest and best use of the land which the valuer has relied on to form an opinion about the value;
- b) Identify the area of land that is above the Q100 flood level and the area that is below the Q100 flood level;
- c) Identify and consider all other real and relevant constraints including:
  - i. Vegetation protection
  - ii. Ecological values including riparian buffers and corridors
  - iii. Stormwater or drainage corridors
  - iv. Slope
  - v. Bushfire and landslide hazards
  - vi. Heritage
  - vii. Airport environs
  - viii. Extractive resources
  - ix. Flooding
  - x. Land use buffer requirements
  - xi. Tenure related constraints
  - xii. Restrictions such as easements, leases, licences and other dealings whether or not registered on title.

- d) Contain relevant sales evidence and clear analysis of how those sales and any other information was relied upon in forming the valuation assessment.

## **2. Weipa Town Authority Determination**

Within 20 business days after the notice and accompanying land valuation report, Weipa Town Authority is to:

- a) Accept the Applicant's valuation; or
- b) Refer the Applicant's valuation to an independent valuation expert nominated by Weipa Town Authority to assess the following:
  - i. Whether the Applicant's valuation is consistent with the current market value;
  - ii. Whether the Applicant's valuation is correctly determined using the before and after method identified above

And give written notice to the applicant stating that it has referred the Applicant's valuation to an independent valuation expert.

Within 20 business days after the independent valuation expert has been given the Applicant's valuation, the independent valuation expert is to:

- a) Provide the independent valuation expert's determination in relation to the matters outlined in section 2(b); and
- b) If the independent valuation expert's determination is that the Applicant's valuation is not consistent with the current market value or is not correctly determined using the before and after method identified above:
  - i. Provide the reasons for the independent valuation expert's determination; and
  - ii. Provide a valuation using the before and after method of valuation identified above.

Following receipt of the independent valuation expert's valuation, Weipa Town Authority is to decide whether to accept or reject the Applicant's valuation within 10 business days.

- a) If Weipa Town Authority accepts the Applicant's valuation, it must give written notice to the Applicant stating that it has agreed to the Applicant's valuation.
- b) If Weipa Town Authority rejects the Applicant's valuation, it must give written notice to the Applicant stating that it has rejected the Applicant's valuation, its reasons for rejecting the Applicant's valuation, and that the independent valuation expert's valuation will be adopted as the establishment cost for land.

### Attachment 3 – Indicative Trunk Infrastructure

The following table defines the trunk infrastructure networks, systems and items.

Trunk Infrastructure Item	Systems	Elements
Water Supply	Bulk Supply Treatment Distribution	Water sources (dams, groundwater) Bulk supply mains Reservoirs Telemetry and instrumentation systems Water Treatment Plants Pump stations Re-chlorination facilities Distribution mains generally $\geq 200$ mm diameter
Sewerage	Collection Treatment Disposal/Reuse	Gravity sewers generally $\geq 225$ mm diameter Manholes located on trunk gravity sewers Pump stations Rising mains generally $\geq 150$ mm diameter Odour and corrosion control systems Telemetry and instrumentation systems Sewerage treatment plants Storage facilities Effluent disposal and reuse systems
Transport	Local Government and State-controlled roads	Arterial, sub-arterial and major collector roads including associated intersections, local road drainage, kerb and channel, swales, culverts, bridges, and pathways within the road reserve.
	Off-road pathways	Cycleways and pedestrian pathways not within the road reserve.
Public Parks and Community Land	Public Parks	Land, works and embellishments for local, regional and destination parks.
	Land for community facilities	Land and basic works associated with the clearing of land and connections to service only.
